

Company Description

Proteo Biotech AG, located in Kiel, is the next generation preventive therapeutic technology company based on its clinical-stage pioneering tissue protective drug.

The Company is fully dedicated to its novel therapy to treat life-threatening unmet medical need diseases. A paradigm shift towards a preventive approach will alleviate the suffering and morbidity in the majority of patients who e.g. undergo highly invasive surgery by protecting against inflammatory organ damage and failure. This initial focus has given us a unique insight into the capabilities of our product as an anti-inflammatory drug usable in a wide variety of indications, which has led to strong collaborative ties to a number of renowned universities worldwide.

We are currently expanding our development activities to initiate new European / US clinical trials (covering clinical Phases Ib to III) and are looking to strengthen our team of dedicated and multidisciplinary professionals in Kiel.

Job Description Clinical Research Project Manager - Junior (m / f / d)

Take your career to the next level and lead challenging full-service clinical trials and research projects, managing the full scope of responsibilities and getting hands-on involvement in every aspect of the study.

Your responsibilities will include:

- Support the management of multi-center clinical trials and research projects in a variety of therapeutic areas (major surgery, PAH, COVID-19) in cooperation with contract research organizations and medical advisors;
- Major contributions to delivery of clinical trials and research projects on time, within budget and in accordance with high quality standards;
- Being a point of contact to the contract research organization, scientific advisory board and other parties on all project matters;

- Contribute to the creation of clinical trial protocol synopses, review of all types of study documents such as clinical trial protocol, informed consent form, IMPD, IB, CRF, statistical analysis plan & report, data management plan, study report, etc.;
- Cooperation with contract research organizations for submission and management of clinical trial applications to ethics committee and regulatory authorities.

Qualifications

- College/University degree in Medical Sciences, Life Sciences or an equivalent combination of education, training & experience;
- One to three years of experience in clinical research;
- One to three years of experience in project management within Phase II and Phase III trials;
- Experience from management of several project phases from startup to closure and management of functional services would be an advantage;
- Junior experience in vendor management would be an advantage;
- Full working proficiency in English;
- Proficiency in MS Office applications;
- Communication, presentation and customer-service skills;
- Ability to negotiate and build relationships at all levels;
- Team-building, resource allocation and organizational skills.

Additional Information

Make the right call and take your career to a whole new level. We are a dynamic biotech startup like company combined with financial soundness and world class investors. We work in flat hierarchies with short decision-making paths and offer a modern working environment characterized by cooperation and innovation.

We offer you a position with responsibility in our agile team that focuses on its people and invests in their professional development, personal well-being and market-orientated compensation to establish Proteo Biotech AG as the next generation preventive therapeutic technology company.
